SACHIN VERMA

MERN Stack Developer | Full Stack Developer

SUMMARY

B.Tech CSE undergraduate (CGPA 8.4) and MERN Stack Developer with strong problem-solving skills, proficient in React.js, Node.js, Express.js, MongoDB, REST APIs, and JWT authentication. Built scalable healthcare platforms supporting 1,000+ donors and 50+ hospitals, with APIs achieving sub-200ms response times. Skilled in Python, SQL, and Power BI, with experience analyzing 10,000+ records and reducing reporting time by 40%. Passionate about building efficient, user-focused web applications and solving real-world problems through technology.

PROFESSIONAL EXPERIENCE

Data Analyst Intern

May '26 - Jul '26

Bluestock Fintech

Remote

- Analyzed 10,000+ financial records using Python (Pandas, NumPy) and SQL to detect market trends
- Reduced data errors by 30% through validation and QA checks on daily financial feeds
- Built interactive Power BI dashboards with DAX and Power Query, cutting reporting turnaround by 40%
- Conducted EDA on portfolio datasets to surface insights supporting risk-assessment workflows

IBM SkillsBuild Intern (Gen AI & Cloud Computing)

Jun '26 - Jul '26

BharatCares / AICTE

Remote

- Completed 6-week hands-on training in AI development, prompt engineering, and cloud deployment
- Earned Official AICTE & BharatCares Internship Completion Certificate for Gen AI & Cloud Computing

PROJECTS

Polar EMS — AI-Driven Smart Energy Management System

Self-Employed

Ghaziabad, Uttar Pradesh

React.js · Python · FastAPI · AI/ML · REST APIs · WebSockets · Weather APIs · Data Analytics

Deployed: https://polar-ems-barl.vercel.app/

- Built a full-stack energy management system for remote polar stations, monitoring solar, wind, diesel, and battery in real time
- Developed ML forecasting on historical energy and weather data to predict generation and battery consumption
- Implemented AI-based energy recommendations and alerts for sudden failures to cut fuel dependency and keep critical loads running
- Designed a What-If simulation module and FastAPI REST endpoints to support reliable energy planning in extreme environments

RedConnect — Real-Time Blood Donation & Emergency Coordination Platform

Self-Employed

Ghaziabad, Uttar Pradesh

React.js · PostgreSQL · Python · Pandas · NumPy · REST APIs · JavaScript

Deployed: https://red-connect-d-h-n.vercel.app/

- Led architecture of a full-stack healthcare platform with Donor, Hospital, NGO, and Admin modules for 4 user roles
- Engineered a smart blood-matching algorithm that reduced match time by 60%, improving emergency response
- Deployed 15+ RESTful endpoints achieving sub-200ms response times across all platform modules
- Integrated Pandas/NumPy analytics to improve NGO procurement planning efficiency by 35%
- Scaled platform to 1,000+ donors and 50+ hospital partners, growing adoption nationwide

MediCare Reminder — Full-Stack MERN Medication Management Platform

Self-Employed

Ghaziabad, Uttar Pradesh

React.js (Vite) · Node.js · Express.js · MongoDB · Mongoose · JWT · Tailwind CSS · Chart.js · Web Push API

Deployed: https://lenevo-assignment2.vercel.app/login

- Led development of secure JWT authentication with HttpOnly cookies across 3 flows: login, registration, password reset
- Built real-time dashboard analytics engine tracking 30-day medication adherence trends with Chart.js
- Engineered full CRUD functionality to manage medicine and prescription records
- Automated medication reminders using Web Push API and Node-cron scheduling, eliminating manual intervention
- Developed health-tracking module visualizing water intake, BMI, steps, blood pressure, and sleep trends

HACKATHONS

- Secured 2 hackathon wins and 5 finalist placements, building full-stack and AI/ML solutions under tight deadlines
- Winner — Tech Eximius 2026
- Led team as Team Lead to finalist placement at Web Nova Hackathon among 1,000+ national teams
- Advanced to the finalist round at Hack on Titan Hackathon, delivering a solution under tight deadlines

ACHIEVEMENTS & LEADERSHIP

- Contributed to open-source projects under the IIT Bombay Open Source Program
- Solved 100+ DSA problems on LeetCode (2-Star, CodeChef) and led teams of 3-5 engineers
- Organized coding competitions and workshops for 100+ students as Technical Team Volunteer at ABES Engineering College

EDUCATION

B.Tech, Computer Science & Engineering • CGPA: 8.4 / 10 Jan '24 - Jan '28

ABES Engineering College Ghaziabad, UP

Certifications: Intro to Machine Learning — NPTEL (2025) • Prompt Engineering — TCS (2026) • Data Analysis — Microsoft (2026)

KEY SKILLS

Skills: React.js, Node.js, Express.js, MongoDB, JavaScript (ES6+), REST API Design, JWT Authentication, Python, Git/GitHub, Problem Solving, Team Leadership, Communication

Spoken Languages: English (Professional), Hindi (Native)

Languages: JavaScript (ES6+), TypeScript, Python, C, C++, SQL

Frontend: React.js, React Router, React Hooks, HTML5, CSS3, Tailwind CSS, Responsive Web Design, Axios

Backend: Node.js, Express.js, REST API Design, JWT Authentication & Authorization, Role-Based Access Control, Express Middleware, File Upload, API Integration

Databases: MongoDB, Mongoose, PostgreSQL, Firebase

Cloud & Deploy: Vercel, Netlify, Render, Railway, Git, GitHub

Dev Tools: VS Code, Postman, Jupyter Notebook

Data Analytics: Pandas, NumPy, Power BI, DAX, Power Query, Excel, Data Cleaning, Data Visualization, Dashboard Development

Core Concepts: DSA, DBMS, OS, API Design, Prompt Engineering
